How long will the integrated power facility last in Timor-Leste?

The duration of the integrated power facility will be about 25 years, and the bid deadline is 1 May. Renewables account for only 8% of the total electricity supply in Timor-Leste, with 99% of that coming from bioenergy and 1% from solar, according to a report issued by the International Energy Agency last year.

How many power plants are there in Timor-Leste?

The generation capacity in Timor-Leste currently stands at almost 300 MW consisting of 3 power plants. In addition to these main power plants meeting most of the power demand of the country, small diesel-fired generators serve as a significant source of electric power in many localities with inadequate power from the grid.

Will Timor-Leste replace oil imports with solar power?

More than 75% of oil imports in Timor-Leste are used for electricity production across the country and around 90% of the sector's operating costs are fuel costs associated with power generation. The Government of Timor-Leste intends to replace part of this high-cost generation by more cost-efficient solar power.
