

# 13kw solar system price Serbia

How much does a 13kw Solar System cost?

Currently, you can expect a 20% return on your investment per year based on the current electricity costs. The typical cost of a 13kW solar system is around \$26,000. It's important to note that solar panel prices have significantly come down over the past decade, making solar energy more affordable for homeowners.

How big is a 13kw solar power system?

A 13kW system using 370W panels will require about 61.4 square meters of roof to be installed. Each 370W panel measures about 1.75m x 1m. 13kW solar power systems are mostly suitable for small businesses with low energy needs. This size of solar power system is classed as "Commercial";.

Is a 13kw Solar System a good investment?

Considering all the factors mentioned above, investing in a 13kW solar system can prove to be highly profitable. With favorable sun exposure in your area, you can generate approximately \$4,033 worth of electricity every year. This translates to a 20% return on investment based on the current costs of solar panels.

Do I need a 13kw Solar System?

Whether or not you need a 13kW solar system will depend on many things. If you are a Commercial customer and you use between 49.3kWhs and 78.5kWhs then a 13kW solar system could be a good choice to help reduce power bill costs. Solar Proof Quotes offer a quick and easy way to get 13kW solar system quotes.

How many kWh does a 13 kW solar system produce?

A 13kW solar system can typically produce an output of 65 kWh per day. This estimate is based on the assumption that the panels receive at least 5 hours of direct sunlight. Over the course of a month, this would amount to 1,950 kWh, and over a year, approximately 23,725 kWh. There are also 15 kW solar systems if you need a different sized system.

Is 13kw solar too much?

As you can guess by the amount of roof space required, 13kW is a serious amount of solar for the ordinary home - and in many cases, it will be too much. In most cases, it will only be appropriate if you're using over 50kWh of energy on average per day - a number much more likely to apply to a business than a home.
