

Acculon energy Heard and McDonald Islands

The Territory of Heard Island and McDonald Islands (HIMI; ISO 3166 region code: HMD, HM, 334;) is an Australian external territory comprising a volcanic group of mostly barren Antarctic islands, about two-thirds of the way from Madagascar to Antarctica. The group's overall land area is 372 km² (144

Named after individual people: Captain John Heard, American sealer who sighted the island on 25 November 1853 & Captain William McDonald, who discovered the McDonald Islands close to Heard Island six weeks later, on 4 January 1854

L'isola Heard e le isole McDonald sono isole disabitate che si trovano nell'Oceano Antartico, a circa due terzi di distanza tra il Madagascar e l'Antartide. Esse costituiscono un territorio esterno australiano dal 1947 e contengono i due soli vulcani attivi presenti sul territorio australiano, uno dei quali (Mawson Peak) è anche la montagna australiana più elevata, con 2.745 metri.

Heard Island is a major research site along the Antarctic Environmental Gradient (AEG). The AEG spans 30 degrees of latitude and includes a range of macro-climatic zones from cool temperate islands to the frigid and arid Antarctic ...

Australian Government - Department of the Environment and Energy - Australian Antarctic Division (englisch). The history and geography of Heard Island, Southern Indian Ocean. (Memento vom 17.

The Heard and McDonald Islands are interesting from a historical perspective because they are one of the few places in the world where two claim lines intersect. There is an ongoing dispute between Argentina and Chile over who has sovereignty over these islands. Most of the people who live on these islands are employed by the Australian ...

Heard Island and McDonald Islands are located in the Southern Ocean, approximately 1,700 km from the Antarctic continent and 4,100 km south-west of Perth. As the only volcanically active subantarctic islands they "open a window into the earth", thus providing the opportunity to observe ongoing geomorphic

McDonald Island is much smaller (2.5 km²), about 100 000 years old and totally ice-free, and is predominantly composed of phonolitic rocks. 9, 10 During the campaign, signs of volcanic activity ...

At Heard Island and McDonald Islands (HIMI), there are no trees or ferns and the most advanced vascular plants are low-growing herbaceous flowering plants. The vascular flora on Heard Island is the smallest of any major subantarctic island group, reflecting the island's isolation, limited ice-free area and severe climate.

Heard and McDonald Islands Heard and McDonald Islands This is one of the wildest and remotest places on earth. Heard Island is dominated by Big Ben, Australia's highest mountain and an active volcano, under a deep mantle of snow and glaciers. On the horizon, the volcanic McDonald Islands rise precipitously out of the world's stormiest waters.
