prompted geothermal energy in Costa Rica. This geothermal camp has an installed capacity of 155 MW. Las Pailas There is a second geothermal camp in Costa Rica called Las Pailas, located on the slopes of Rincón de la Vieja volcano in Guanacaste. Its first plant, Las Pailas I, started operation in 2011 and the second, Las Pailas II, in July 2019.

The inverters and motors are designed to be highly efficient with more than 90% of the electrical energy drawn from the battery converted into mechanical energy to move the vehicle. The lost energy does not simply disappear, it is converted into heat. Power inverters in BEVs are a prime example of the scale problem in modern thermal management.
