Is Afghanistan a gas-to-power country?

Security concerns and political instability are chronic issues. Gas-to-power has been the recent strategic priority. Almost all of Afghanistan's existing discoveries are in the north of the country - in the Amu Darya basin that is prolific in neighbouring Turkmenistan and Uzbekistan.

Is gas-to-power a strategic priority in Afghanistan?

Gas-to-power has been the recent strategic priority. Almost all of Afghanistan's existing discoveries are in the north of the country - in the Amu Darya basin that is prolific in neighbouring Turkmenistan and Uzbekistan. Afghanistan held five licensing rounds in 2009-14, but only three PSCs were signed.

What challenges are facing Afghanistan's oil & gas production?

Even before this, plans for upstream production growth faced multiple technical, commercial and above-ground challenges. Despite ambitious plans since the 2000s, Afghanistan's current oil and gas production is very minor. Security concerns and political instability are chronic issues. Gas-to-power has been the recent strategic priority.

How many PSCs have been signed in Afghanistan?

Afghanistan held five licensing rounds in 2009-14, but only three PSCs were signed. The most recent tender was in 2014 - for the large Totimaidan block near the Turkmenistan border, including the undeveloped Juma and Bashikurd sour gas fields. Despite announcement of a winning bid, the PSC was never signed.
