

Agr photovoltaic Heard and McDonald Islands

Why are Heard Island and McDonald Islands isolated?

However, the site's isolation assists in reducing anthropogenic impacts upon the site's values. Heard Island and McDonald Islands are located in the Southern Ocean, approximately 1,700 km from the Antarctic continent and 4,100 km south-west of Perth.

Are Heard Island and McDonald Islands Endangered?

The overall assessment is that there is a low threat to the World Heritage values of Heard Island and the McDonald Islands if visitation remains low. Climate change, the introduction of non-native species and the potential expanding extent of *Poa annua* are the greatest threats to the natural values on the islands.

Are there seabirds in Heard Island and McDonald Islands?

The inshore fishes of Heard and McDonald Islands, Southern Indian Ocean. *Journal of Fish Biology* 23: 283-292. Woehler, E. (1991). Status and conservation of the seabirds of Heard Island and the McDonald Islands. In Croxall, J. (ed.), *Seabird Status and Conservation: A Supplement*. ICBP Technical Publication No. 11.

Does bird migration affect the conservation value of Iles Kerguelen?

The isolation of the site has contributed somewhat to the maintenance of its high conservation value, but with significant non-native species on Iles Kerguelen to the north west, natural processes, such as bird migration, may adversely affect the value through transportation of these non-native species.

The islands are part of the Southern Indian Ocean Islands tundra ecoregion that includes several subantarctic islands. In this cold climate, plant life is mainly limited to grasses, lichens, and mosses. Low plant diversity reflects the islands' isolation, small size, severe climate, the short, cool growing season and, for Heard Island, substantial permanent ice cover. The main environmental deter...
