Services extend to heli-transport, supporting operations in these sectors by offering efficient and

What services does airborne offer?

Utilizing Fixed Wing and Rotary Wing aircraft, Airborne specializes in a wide range of services including Pipeline Patrols, Lease/site Inspections, Gas Leak Detection, Aerial Photography, Fire Patrols, Forestry and Forest Health Surveys and Mapping, Wildlife Surveys, Gas Mapping Lidar, and Construction Support.

What are some alternatives to Airborne Energy Solutions?

Alternatives and possible competitors to Airborne Energy Solutions may include Akron-Canton Airport, Polaris Aviation, and Starlink Aviation. Airborne Energy Solutions offers aerial surveillance, aircraft charter services, and heli-transport for various industries.

What type of energy is produced in Albania?

Energy production includes biomass (including wastes, residues, non-food cellulosic material, and lignocellulosic material), lignite and natural gas. Because domestic energy production is not able to meet demand, Albania is on average a net energy importer.

What are the opportunities for solar energy deployment in Albania?

Opportunities for the deployment of solar energy are extensive. Albania's solar insolation is very high throughout most of its territory at more than 1 500 kWh/m² annually, with peaks of 1 753 kWh/m² annually, particularly in the western part of the country.

Are solar and wind resources a viable option in Albania?

For solar and wind resources in Albania, economic potential analysis and zoning are lacking. This hinders policy development in setting achievable targets, the appropriate sizing of solar and wind auctions, and least-cost power system planning.
