

Who produces electricity in Albania?

Albanian Power Corporation(KESH) is the public producer and the largest producer of electricity in Albania. KESH manages the main electricity production plants in the country.

Does Albania have a power supply security problem?

Albania is a net importer of electricity; power supply security is a challenge. Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable.

Does Albania have a hydro power plant?

Albania's domestic generation is almost entirely dependent on hydropower since the country's only thermal power plant is currently inoperable. The total installed generation capacity has increased over the last few years because of new private investments in hydro power plants and more recently in small solar farms.

Here are some key points regarding Albania's renewable energy situation: Albania has set renewable energy targets as part of its commitment to the European Union and its efforts to enhance sustainability. These targets aim to increase the share of renewable energy in the overall energy mix. Like many countries, Albania faces challenges in terms ...
