

Albania: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO<sub>2</sub> - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Construction of new generation sources and transmission lines, improvements to the grid, and investment in renewable energy all represent promising investment opportunities in Albania. Over the past decade, the government has undertaken a series of public investments and initiatives to address sector shortcomings, chiefly with support by ...
