The government of Palau has proposed a target of achieving 100% of its electricity generation from renewable energy sources by 2050. This renewable energy roadmap for the Republic of Palau has subsequently been developed by the International Renewable Energy Agency (IRENA) at the request of the Ministry of Public Infrastructure, Industries and ...

Renewable energy comes from unlimited, naturally replenished resources, such as the sun, tides, and wind. Renewable energy can be used for electricity generation, space and water heating and cooling, and transportation. Non-renewable energy, in contrast, comes from finite sources, such as coal, natural gas, and oil.

to deploying energy efficiency and renewable energy technologies, and has taken measures to mitigate and adapt to climate change. This work is grounded in Palau's 2010 National Energy Policy. Palau has also developed an energy action plan to outline concrete steps the island nation could take to achieve the energy
