**THE POWER OF RECYCLED ALUMINUM** The New "Clean Fuel" Imagine if you could store energy from excess renewable generation forever, and transport it with zero losses. AlumaPower makes this possible. Aluminum has an incredibly high energy density at 2.5x that of gasoline or diesel. Aluminum is abundant, non-volatile, lightweight, has an indefinite ...

Prior to these roles, Paul Simpson was the Business Manager for UK and Ireland at Altran. Paul Simpson, MBA, holds a Master of Business Administration (MBA) degree specializing in Managing Complexity and Change, which they obtained from the University of Leicester in the years 1997 to 1999. Paul also holds a Bachelor's degree in Engineering (B ...

AlumaPower's breakthrough technology is the "Aluminum-air galvanic generator", a portable long-life energy source that runs on recycled aluminum as fuel. It produces zero emissions while delivering over 4 times the energy density of lithium-ion batteries.

Charging the Future. Changing our World. Page 2 o Safe, non-volatile power - no risk of fire or explosion o Lightweight, easy to transport - including by air o Rapid reload/recharge in minutes o Indefinite shelf life - no loss of charge, can be stored indefinitely o Grid independent - does not require local electricity networks or infrastructure

Similar Companies: BioSolar USA Publicly Traded BioSolar is developing a breakthrough technology to increase the storage capacity, lower the cost and extend the life of lithium-ion batteries. A battery contains two major parts, a cathode and an anode, that function together as the positive and negative sides.
