Interesting for drive units, competitive with Molicel P42A, P45B The tabless technology was patented by Tesla in 2020-05-14 (Publication) Available now, the Ampace JP40 at a price of 5usd per cell (130 batch) Tested and confirmed by Mooch: "This is the best performing round cell I've tested for moderate to very high power applications ...

In early testing it's not quite as good a performer as what appears to be the Ampace JP40 (still need unaltered factory wrapped cells to test) but they're close. The Molicel P50B performs a bit worse than the 40PL and JP40 but runs at a much steadier voltage at extreme power levels, has incredibly long cycle life at high power levels, and ...

Premium Ebike Batteries brought to you by Bicycle Motor Works, a family owned business since 2014. All of our ebike battery packs are proudly built in the U.S.The NEW Ampace JP40 21700 Cell Is The Most Advanced In Lithium-Ion Technology! They are superior in High-Current applications in several ways:-Highest performing 21700 cell by discharge rate-Performs ...
