

Amped solar Czechia

What is MPED innovation?

Light it. Air it. Freeze it. Amped Innovation is a designer and manufacturer of high-performance off-grid, solar systems and appliances for solar-rich environments. Working closely with its distribution partners, Amped serves hundreds of thousands of families and small businesses in need of reliable, clean energy across Africa and Asia.

Why should you choose amped solar?

Amped's reputation in product innovation and quality has made its solar products the preferred option, and has made Amped distributors a trusted energy partner across communities. Amped builds long-term relationships, supporting customers every step of the way.

Who backed Amped Innovation?

Amped is backed by leading social impact investors and institutions. Amped Innovation also raised over \$175,000 in equity financing through Republic, a crowdsourced funding platform. With the Solar Generator, Amped has developed an affordable product that will significantly contribute to reduce the number of small fuel generators in African cities.

Will Czechia reach its solar potential?

As Czechia reaches its solar potential, with impending changes to the country's legislative landscape ushering in greater utility-scale solar array rollouts, over 5,000 attendees - government ministers, industry experts, and key business stakeholders - descended on Prague this week for the 2023 Smart Energy Forum.

Is amped a good alternative to a fuel generator?

Fuel generators are polluting, emitting over 5 tons of CO₂ per year, and hazardous, increasing lung cancer risk by 70%. Amped's solar generator is the first viable clean alternative, which out-competes the fuel generator on both performance and price. Amped is backed by leading social impact investors and institutions.

How many solar power plants did Czechia build in 2023?

Czechia built around 1 GW of new PV plants in 2023, according to data from the Czech Solar Association (Solání Asociace). In total, 82,799 solar power plants were connected to the grid, with a combined total output of 970 MW. The nation achieved a record-breaking year with 145% growth, connecting 49,000 more power plants than it did in 2022.
