Skeleton Technologies travaille sur les ultracondensateurs depuis 2009 et a fait ces derniers mois des avancées remarquables avec le graphène. Pour accélérer ses ...

Skeleton Technologies was created in 2009 for the purpose of developing graphene-based supercapacitors. In 2011, the company started the development of SpaceCap, a capacitor based on Skeleton's proprietary carbide-derived carbon material, as a part of a commission from the European Space Agency. [13] In 2012, Skeleton launched its first commercial product series.

Skeleton Technologies is strengthening its presence in Finland by opening a new research and product (R& D) development unit at LUT University campus area in Lappeenranta this year. This marks the company's second major investment in Finland, following the investment in a pilot factory in Varkaus early 2023. The approximately 9,400-square-meter ...

Skeleton Technologies is the global technology leader in supercapacitor energy storage in automotive, transportation, grid and industrial applications. For us, developing and producing the best supercapacitor cells, modules, and systems in the world is means to an end: helping companies to reduce CO2 emissions and save

energy.

Skeleton Technologies is at the forefront of energy storage technology, developing and producing advanced ultracapacitors. As a part of the "Startup of the month" series, we had a chance to interview Taavi Madiberk, CEO of ...

Skeleton Technologies, a Global Cleantech 100 company and technology leader in supercapacitor and energy storage, today announced its Round D3 with 37.6 million euros of equity investments. According to Spiegel, this means that ...

We're excited to announce that Skeleton Technologies is expanding in #Lappeenranta -- Europe's greenest city! We're opening a new R& D unit at LUT University's campus area this year, marking our second-biggest investment in Finland, following the launch of our pilot factory in Varkaus in early 2023 today's fast-evolving energy landscape, saving energy is more critical ...

OverviewAboutHistoryIndustries and applicationsTechnologyFinancingSkeleton Technologies is an energy storage developer and manufacturer for AI data center, transportation, grid, and defence applications. Skeleton is developing a novel raw material, curved graphene, to produce solutions for the energy storage market, including high-power supercapacitors.

Rappelons que les produits de stockage de Skeleton Technologies sont basés sur du graphène incurvé (curved graphene) qui permet d'atteindre des niveaux de performances de haut vol sans recourir des matériaux toxiques. Le graphène incurvé est développé dans les installations de Skeleton Materials situées à Bitterfeld ...

Currently, Skeleton Technologies is a private company. In November 2020, it raised \$48.5 million in a Series D financing round. To date, the company has raised \$109 million from investors.
