LOUISVILLE, Colo., Aug. 06, 2024 (GLOBE NEWSWIRE) - Solid Power, Inc. (Nasdaq: SLDP), a leading developer of solid-state battery technology, today announced its operational and financial results for the second quarter of 2024. Recent Business Highlights Received positive feedback from increased electrolyte sampling and made shipments to ...

Solid Power is a promising player in solid-state battery technology for electric vehicles, backed by strategic partnerships and prominent investors. Click here to read why it is a buy.

A traditional lithium-ion battery uses a liquid electrolyte with a separator between the electrodes to prevent short-circuits while allowing the ions to pass. In a solid-state battery, the electrolyte is a solid material, like a ceramic, which stops the growth of dendrites and also prevents short-circuits.

SLDP has made it clear that they don't need to advertise or promote because the battery industry knows who they are now. They have all the money they need going forward for the foreseeable future. They have a supposedly temporary CEO who knows the business in and out and I suspect they really aren't looking for a new one just to pay a salary.

Background and Update. Solid Power (NASDAQ:SLDP) has built one of the most impressive next-generation lithium-metal batteries. The company has partnered with OEM players, Ford (), BMW (OTCPK:BMWYY ...

The R& D license particularly stands out, facilitating a collaborative approach to developing cutting-edge solid-state battery technologies. By pooling resources and knowledge ...

Inc(SLDP)??????????			

We are working with. Solid Power has extensive partnerships with both BMW and Ford to jointly develop all-solid-state batteries. In October 2021, Solid Power announced a partnership with SK Innovation to produce Solid Power's automotive-scale all-solid-state battery cells utilizing Solid Power's sulfide-based solid electrolyte, proprietary cell designs and production processes.

Why would you post this without mentioning that the headline and the article don't match? It specifically states in the first sentence that it is not a solid state battery. Then in the second sentence they go back to calling it a solid state again. It's just like the bologna about the QS semi-solid state. Nobody has a solid state except SLDP.
