How many solar PV installations are there in the UK?

We present the results of a major crowd-sourcing campaign to create open geographic data for over 260,000 solar PV installations across the UK, covering an estimated 86% of the capacity in the country.

What is a large scale solar PV installation called?

Large scale solar PV installations are known as solar farms. Planning is a devolved matter. The main focus of this briefing is on planning in England. The joint briefing paper Comparison of the planning systems in the four UK countries: 2016 update provides information about planning and consenting regimes in the other UK countries.¹

How will the UK's solar projects impact the future?

Together, the projects will help ramp up the UK's solar capacity as it targets 70 GW by 2035 -- a fivefold increase from the approximately 14 GW installed today, requiring at least 4 GW of new capacity to be built each year. UK 'best market' for giant projects

Are solar projects considered 'nationally significant infrastructure projects' in the UK?

Under UK planning rules, solar developments larger than 50 MW are deemed to be "nationally significant infrastructure projects" and must be consented to at a national government level via DCOs, rather than applying for traditional permits from local authorities.

Is there a shortage of solar power in the UK?

Solar Energy UK said there had been rapid growth in rooftop solar installations this year, with 57,125 below 50kW so far, only slightly less than the number installed in the whole of 2021. However, the biggest obstacle facing new solar projects was a lack of capacity in the electricity grid, Solar UK said.
