

Anodox energy Laos

Who is anodox energy systems?

Janis Vitenbergs, Latvia's Minister of the Economy Founded in 2016, Anodox Energy Systems serves the needs of the rapidly growing electric mobility industry by meeting the increasing demand for high-capacity batteries. Anodox has supported internationally renowned brands such as Volvo, NEVS, Jinpeng Auto, Geely, Lotus, Mahindra, and Pininfarina.

Will anodox produce high-quality battery packs?

In the first phase, Anodox wants to produce high-quality battery packs for electric cars and light commercial vehicles in the automated factory. More interesting than the first factory for assembling battery packs, however, is the second planned factory - although fewer details are known about this. It will produce LFP high-performance cells.

Is anodox liable for a loss of data?

ANODOX is under no circumstances liable for indirect or consequential damages, such as loss of production or loss of profit, or other damages resulting from the impossibility or difficulty of using computers or information, or for loss of data.

What brands does anodox support?

Anodox has supported internationally renowned brands such as Volvo, NEVS, Jinpeng Auto, Geely, Lotus, Mahindra, and Pininfarina. Their R&D centre in Sweden develops electric batteries for light trucks, passenger cars, marine and other vehicles.

Does anodox offer a guarantee?

The information provided on ANODOX's website does not constitute any statement of usability, suitability or guarantee other than where this is directly stated in writing to the customer. Current offers are valid while stocks last, unless otherwise stated.

Originally formed in 2016, Anodox has a strong automotive industry pedigree. The firm's consulting assignments have included high-profile projects with internationally recognised brands. Now the company is focussed on pursuing large product supply contracts, targeting the rapidly expanding Electric Vehicle (EV) and sta

Swedish tech company Anodox Energy Systems has announced plans to produce electric vehicle batteries in Latvia, with the first factory in the Port of Riga expected to be operational by December 2022. A second factory for rapidly growing LFP cell technology will be established soon after. A total of EUR50 million will be invested and up to 300 new jobs will be created.
