

Renewable energy and energy storage developer Boom Power has successfully landed planning permission for a major battery energy storage system (BESS) project on the Isle of Anglesey, Wales, UK. The Carrog BESS is a 300MW/660MWh, 2-hour duration project located at Carrog Ganol, near Cemaes. The developers emphasise that the 38.7-acre project ...

The owner of the project is Trinasolar's International System Business Unit (ISBU), its global project development. The standalone BESS will support grid stability and also do wholesale energy trading. The project has a contract with Italian transmission system operator (TSO) Terna to provide the Fast Reserve ancillary service for 1,000 ...

The UK has been ranked the world's third most attractive country for BESS development, and major investment into the UK BESS sector has been on the rise. Power producer RWE has been making significant moves in the BESS sector, with the company recently announcing it was moving forward with proposals for a 350MW BESS to be located in Wales.

By strategically incorporating BESS with renewable sources and utilizing artificial intelligence (AI) for optimization, the industry is advancing towards a more sustainable and resilient energy future. Let's delve into the top ...

Earlier this year (15 April), the organisation confirmed that its 50MW/100MWh 2-hour duration Salisbury project became its first operational BESS. SSE Renewables is also constructing a 150MW battery project in Ferrybridge, West Yorkshire, which is due for completion in the first half of 2025. EIG launches new BESS developer with 3GW BESS pipeline

Energy storage developer NineDot Energy has secured financing from investors including Manulife Investment Management to progress its pipeline of New York projects. The company develops community-scale battery energy storage system (BESS) projects in the New York Metropolitan area. As such, in 2022 it became the first to install Tesla Megapack ...

The global demand for renewable energy has led to the rise of battery energy storage system companies, also called BESS companies, which are pivotal for efficient and reliable energy storage. In this blog, we will list the ...

5 ???&#0183; This is an important step to enable the transition from fossil fuels to renewable sources such as wind and solar. BESS capacity almost tripled in 2023 (27GwH - 74GwH) and is ...

System integrator and project developer On.Energy has acquired nine in-development battery energy storage

projects, which will play into California's CAISO market. The company announced via LinkedIn yesterday (16 September) that it has completed the acquisition of 480MWh of what it described as "utility-scale distributed generation projects."

Green industries are vital in combating climate change and reaching the UK's net zero targets. At Atlantic Green, we see first-hand the challenges faced when attempting to ...

BESS developer and EPC firm has partnered with flexibility provider Entelios and optimiser enspired, for the commercialisation of its Eco Power One BESS project in Schleswig-Holstein, Germany. The 103.5MW/238.5MWh BESS is the first of a series of large-scale projects that Eco Stor is building in Germany, and is set to come online in January ...

SSE Renewables has taken ownership of a 120MW/240MWh battery energy storage system (BESS) project under development in Ireland's Midlands. SSE Renewables acquired the project development rights for the Thornsberry BESS, a consented project due to be located in County Offaly, from Grid Systems Services, a BESS developer owned by Low Carbon.

For instance, Europe's first commercial BESS development, Schwerin Battery Park, in Germany was able to restore power to a grid in the midst of an unexpected blackout. Moreover, &#216;rsted developed a BESS project, the ...

Developer Giga Storage has acquired a closed distribution grid in Groningen, the Netherlands, with the aim of deploying large-scale battery storage projects at the site. The deal sees Giga Storage buy the distribution grid in the Delfzijl region which has a connection to the high-voltage network of the Netherlands.

Developer Elements Green has secured preliminary planning approval for a 400MW battery energy storage system (BESS) project in Germany. The UK-headquartered company, active internationally, announced the ...
