

Are W&#228;rtil&#228; ESS modules safe?

Fire safety is a major priority for the energy storage industry and W&#228;rtil&#228;'s ESSs are designed to meet stringent safety and quality standards. The rigorous testing involved intentionally heating a cell to induce thermal runaway within a W&#228;rtil&#228; ESS module.

Who is W&#228;rtil&#228; energy storage & optimisation?

W&#228;rtil&#228; Energy Storage & Optimisation (ES&O) is a leader in game-changing products and technologies to the global power industry. We're integrating end-to-end grid solutions that build a resilient, intelligent and flexible energy infrastructure.

Does W&#228;rtil&#228; offer an ESS design?

For National Grid EFR and dFFR projects that are participating in the capacity market, W&#228;rtil&#228; offers an ESS design with spacing and cabling pre-planned to modify battery storage duration at a future date. W&#228;rtil&#228; developed a 10 MW /5 MWh system with spacing and cabling pre-planned for conversion to 10 MW /20 MWh in the future.

What is a W&#228;rtil&#228; ESS test?

The rigorous testing involved intentionally heating a cell to induce thermal runaway within a W&#228;rtil&#228; ESS module. Performing these tests reveals important information to the manufacturer, first responders and asset owner about how the system will react in the highly unlikely event of a cell failure.

How many GW of power plant capacity does W&#228;rtil&#228; have?

Our track record comprises 76 GW of power plant capacity and 110 energy storage systems delivered to 180 countries around the world. W&#228;rtil&#228; is a global leader in innovative technologies and lifecycle solutions for the marine and energy markets.

How many employees does W&#228;rtil&#228; have?

Our dedicated and passionate team of 17,500 professionals in more than 240 locations in 79 countries shape the decarbonisation transformation of our industries across the globe. In 2022, W&#228;rtil&#228;'s net sales totalled EUR 5.8 billion. W&#228;rtil&#228; is listed on Nasdaq Helsinki.

V20 Energy has picked the AiON-ESS Power Series configuration, which is suitable for short duration applications requiring one hour of storage or less. Its counterpart, the Energy Series, is configurable for applications requiring two to four hours duration.

Technology group W&#228;rtil&#228; has signed a repeat order with EDF Renewables UK to deliver a grid-scale energy storage system (ESS) in Bramford, United Kingdom (UK). The 57 MW / 114 MWh project

will support the transition to a decarbonised electricity system and help achieve the UK's net zero goals.
