

Antigua and Barbuda kdv energy

How much does electricity cost in Antigua and Barbuda?

This profile provides a snapshot of the energy landscape of Antigua and Barbuda, an independent nation in the Leeward Islands in the eastern Caribbean Sea. Antigua and Barbuda's utility rates are approximately \$0.37 U.S. dollars (USD) per kilowatt-hour (kWh), which is above the Caribbean regional average of \$0.33 USD/kWh.

Will Antigua and Barbuda have a 100% renewable power system?

The current power system of Antigua and Barbuda was used to calibrate the model in HOMER, and subsequently various scenarios were considered to provide the Government with the least-cost pathway for a 100% renewable energy power system by 2030. The study has considered the following five main scenarios:

What is Antigua & Barbuda's energy policy?

Antigua and Barbuda published a draft of its National Energy Policy in December 2010, with the dual goals of reducing energy costs by diversifying away from fossil fuels and driving development of new technologies and sectors.

Can Antigua and Barbuda achieve a fully decarbonised power system?

As analysed in the roadmap, the deployment of solar PV and battery systems for the residential sector of Antigua and Barbuda will be an important element, as planned by the Government, for achieving a fully decarbonised power system by 2030.

Will Antigua and Barbuda increase its share of renewables?

The current power system is widely dominated by fossil fuel generation, and with the plans in place as of 2020, the renewable share would merely increase to 9%. To significantly increase its share of renewables, Antigua and Barbuda should follow the pathway of the optimal system scenario outlined in the Roadmap.

How many power plants does Antigua and Barbuda have?

Antigua and Barbuda's power sector relies heavily on conventional fossil fuel generation to supply electricity. Currently, the country has a total of three main power plants consisting of heavy fuel oil generators of various capacities. The APC Power Plant is the largest on the island with three generators of 14.4 MW and one of 17.1 MW.

Antigua and Barbuda is a small dual-island nation in the Caribbean, the most northeastern of the Lesser Antilles []. Of the total population, 97% is on Antigua, although the islands are comparable in land area, with the island of Antigua having an area of 281 km² and the island of Barbuda having an area of 161 km² []. The tropical climate has very little variation ...
