

Approval for installing solar photovoltaic panels

How is a solar energy project approved?

The approval process for a solar energy project involves several basic steps. First, a permit application is submitted for review by a local permitting agency, known as the "enforcing agency." Typically, the contractor installing the solar energy system will submit the permit on behalf of the building owner.

Do you need a permit to install solar panels?

Generally, local governments require a homeowner's solar installer/contractor to obtain a permit for rooftop panels before they can be installed. After the PV system is installed, a professional from the local government will inspect the new array to ensure all building, electrical, and safety codes have been followed.

How do I get a permit for a rooftop solar system?

One of the process steps which is more complex is acquiring the necessary permits from city, county, and/or state offices. Blue Raven Solar has a team dedicated to submitting, approving, and verifying permits. Here are some of the most common questions associated to permitting for rooftop solar panel systems:

Can a rooftop solar PV system be installed on a building?

The vast majority of rooftop solar PV systems are installed on existing structures. Even though very few of these buildings were constructed specifically for installing solar equipment, many of them are well suited for PV systems.

Does a solar permit require a single application form?

SolSmart's Standardized Solar Permit Application Form While requiring a single application form under existing permitting processes represents an improvement over requiring both a building and electrical permit, it may still be more time consuming to complete, review, and approve permits via a process not specifically designed for solar.

Do I need an inspection before installing solar panels?

An inspection before installation is necessary to ensure that your property's electrical system can handle the addition of solar. If you're installing a rooftop solar panel system, an engineer will also need to inspect your roof's structure to make sure it can withstand the additional weight of the solar panels and racking equipment.

Solar panel building regulations. ... The installation of solar panels on a roof or wall of a private house is considered to be permitted development (i.e. doesn't require planning permission) ...

This grant will help you install Solar Photovoltaic panels in your home to generate renewable electricity. Learn about the grant values and how to apply. ... To qualify for the grant, you must ...
