

Are photovoltaic panels custom-made or purchased

Can I make a solar panel in a custom shape?

Yes, it is possible to make a solar panel in a custom shape. At Voltaic, we manufacture custom and standard small solar panels and while most are rectangular, we have experience designing and deploying a full range of interesting shapes and sizes.

Why should I get a custom solar panel design?

Receive a custom prepared design for a solar panel system prepared by an experienced technician. This personalized solar design helps you to make an informed, unbiased decision to find the best solar power system at the lowest cost.

How much does it cost to design a custom solar panel?

There are no design fees to create a prototype of your custom solar panel. Some, but not most, designs may require a fee to prepare the machinery to create your specific panel at volume. Our MOQ is 500 - 2,000 units depending on the size of the panel.

What is a custom solar panel design tool?

Because it can be difficult to explain all these options over the phone, in an email, or on a webpage, we developed a Custom Solar Panel Design Tool. Customers can use this tool to learn the basic anatomy of a solar panel, some of the customization options available, and create a custom solution that meets their needs.

Why are solar panels so popular in America?

In addition to the United States' growing ability to manufacture the components of solar panels, policy incentives, such as those that result in financial benefit for solar customers and tariffs on imported solar panels, have contributed to the rise in companies manufacturing their solar panels in America and consumers seeking them.

Should I start a solar project with small Solar panels?

Prototype your project with small solar panels before moving forward with custom designs. This allows you to confirm the efficiency of the circuit and power production estimates before investing in a custom design.
