

Are solar panels on roofs useful

Can you put solar panels on a roof?

Ground-mounted systems are another alternative to fitting solar panels on your roof. Some state-of-the-art systems can rotate to follow the sun and maximise the amount of electricity they produce. This can be a good option if your roof isn't a suitable place to put a solar panel system. However, they may need foundations and can also be pricey.

How do solar panels work on a flat roof?

Solar panels work best when angled towards the sun, so panels on flat roofs are normally tilted up to help maximise energy production. It's important that any solar panel system maintains the integrity of the roof covering to keep it watertight. For this reason, many systems are weighted down rather than fixed through the roof covering.

What is a solar roof system?

The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics. With an on-roof system, the panels are clearly added on as an afterthought and are not integrated into your home.

What is on-roof solar roofing?

On-roof solar panels make up the most widely recognisable solar roofing system in the UK. The system is made up of individual panels mounted onto the roof which sit on top of your existing tiles or other roof finish. This solar roofing system is proven and widely available, but the main downside is the aesthetics.

Can a UK roof support solar panels?

As long as your roof is pitched, has enough unshaded space, and doesn't contain spray foam insulation underneath, it should be suitable for solar panels. The large majority of UK roofs are more than capable of supporting solar panels for as long as you need them to.

Are flat roof solar panels a viable option?

In reality, flat roofs are just as viable and can bring many unique advantages, being easier to maintain and offering a simpler installation process. Let's discuss the costs, benefits, and drawbacks of flat roof mounted solar panels.
