

Argentina green energy solutions pvt ltd

Does Argentina have a green energy policy?

This approach is guided by the Hamburg Principles adopted by the G20 in 2017 and builds on the substantial experience across the institution. Despite large renewable energy resources, Argentina gets just 2 percent of its power from green energy.

Is reducing air pollution a good idea for Argentina?

This is about 4 percent of Argentina's NDC commitment for 2030. Reduced air pollution also promises health benefits for the population. The energy is not only cleaner but also cheaper: the latest auction resulted in winning bids that are 41 percent below 2015 prices.

How many wind farms are there in Argentina?

All five wind farms are equipped with GW 3S smart wind turbines, with a total of 109 units and 354.6MW installed capacity. About 1.6 billion kilowatt-hours of clean power will be generated annually after all five projects are put into operation, which will produce stable and continuous green energy to Argentina.
