With SWS Power Solutions, the shift of climate-neutral refrigerated logistics to rail can now begin worldwide. Transport on the move and the beginning of a new era . Our mission for modern logistics . The transportation of goods is an essential part of any economy. Temperature-sensitive goods make up a large proportion of the transportation volume.

There are many ways to reduce CO2 in road transport, like using Zero Emission Trucks (electric trucks). But why stop at just one approach? One train with a single driver can replace 44 truck-trailers! SWS Power Solutions offers a smart and powerful solution to promote rail transport, especially in cold chain logistics. Keep up the great work, Patrick Sluga and the SWS team!
