

How much energy is used in energy-intensive industries in Argentina?

Today, around 45% of energy used in energy-intensive industries is natural gas: energy-intensive industries account for 60% of total energy demand in industry in Argentina. Industrial activity in Argentina sees less growth than the average in the region. Most of this modest increase is met by natural gas and electricity in the STEPS.

Why is Argentina reversing Vaca Muerta pipelines?

Meanwhile, Argentina is investing in infrastructure to expand the distribution of natural gas from the Vaca Muerta formation to northern Argentina, including reversing pipelines designed for imports from Bolivia in order to export natural gas to Brazil.

Will Argentina export liquefied natural gas by 2032?

The government's goal is to export \$15 billion worth of liquefied natural gas annually by 2032, up from zero currently. "Until now, all gas projects were done by the state as public works. Now that's not an option," said Daniel Dreizzen, Argentina's former secretary of energy planning and now director of Aleph Energy, a consulting firm.

Does Argentina have a new energy pipeline?

Now that's not an option," said Daniel Dreizzen, Argentina's former secretary of energy planning and now director of Aleph Energy, a consulting firm. The country's newest, \$710-million pipeline opened this month, funded by the government and a loan from the Development Bank of Latin America and the Caribbean.

Why did Argentina's natural gas imports fall 47% in 2024?

Argentina's natural gas imports via pipeline fell by 47% in the first nine months of 2024 compared with the same period in 2023. The decline was largely because pipeline imports from Bolivia, which made up around half of Argentina's natural gas imports in 2023, ended in September 2024.

What is the future of electricity in Patagonia?

Natural gas supplies 50% of electricity today, but wind and solar PV meet most of the demand growth in both scenarios, driven by the significant wind potential in Patagonia. In the APS, solar PV and wind produce 67% of electricity generation by 2050, up from 12% today. Nuclear generation also increases. Gas-fired generation falls steadily. IEA.

The U.S. and Argentina possess the largest unconventional oil and gas resources in the world. While Argentina is in the early stages of becoming a net exporter, the U.S. (driven by State of Texas) is the world's #1 LNG exporter and a net oil and gas exporter after decades of energy deficits.

El pasado 8 de julio, Vista Energy Argentina S.A.U. ("Vista") emitió exitosamente las Obligaciones Negociables Clase XXV --simples, no convertibles en acciones, denominadas en Dólares Estadounidenses, a ser integradas y pagaderas en Pesos--, por un valor nominal de US\$ 53.195.250 (Dólares Estadounidenses cincuenta y tres millones ciento noventa y cinco mil ...

Crude oil and natural gas production in Argentina are both nearing record highs, driven by increasing output from the Vaca Muerta shale formation, which is offsetting declining ...

El Índice S& P/BYMA Energía (ARS) es uno de los nueve índices basados en el Estándar Internacional de Clasificación de la Industria (GICS) que forman parte de los índices sectoriales S& P/BYMA. Estos índices buscan medir los diferentes sectores del mercado de valores de Argentina y son ponderados por capitalización de mercado ajustada al capital flotante.

A key project in the advancement of solar energy in Argentina The Cauchari photovoltaic plant represents an achievement for Argentina and all of South America. This project will not only generate a significant amount of renewable energy, but will also create jobs and provide substantial income to the province of Jujuy.

Argentinien's überraschende Energiewende 22.08.2024 22. August 2024. Der Energiesektor ist auf dem Weg ein wichtiger Stützpfeiler der argentinischen Handelsbilanz zu werden.

The Federal Energy Regulatory Commission (FERC), in Docket No. ER24-99-000, recently approved a suite of tariff revisions submitted by PJM intended to ... The resulting accredited UCAP value will ...

Crude oil and natural gas production in Argentina are both nearing record highs, driven by increasing output from the Vaca Muerta shale formation, which is offsetting declining output from conventional oil and natural gas fields. From January 2021 through September 2024, crude oil production in Argentina increased by 50%, and natural gas production rose by 27%, ...

The government of Argentina has set an 8% export duty on biodiesel, which is expected to have a large effect on the European fuel market, ofimazine reported on December 19. To come into effect on 1 January 2018, the export tax could now support fatty acid methyl ester (FAME) 0 biodiesel, either by raising import costs or reducing the ...

As of 2020 Argentina had an installed wind energy capacity of 1.6 GW, with 931 MW installed in 2019 alone. [22] Electricity production from onshore wind power in Argentina has increased from 1.41 TWh in 2018 to 9.42 TWh in 2020. [23]

Argentina has a target to reach 8% of renewable electricity generation by 2016, established in 2006 by Law 26190. In order to reach its target, in 2009 Argentina launched an auction through its national energy company (ENARSA). The auction, known as ^GENREN \_ aimed to deploy 1000MW of renewable electricity capacity distributed

Argentina is also making headway in the National Productivity Plan to propel production, accelerate growth and achieve full employment and better quality of life for its citizens. >> There are also a wide range of opportunities as regarding renewable energy. The Act 27,191, which was passed in late 2015, sets forth that 20% of the consumed ...

UCAP Power(TM), a global provider of ultracapacitor-based power solutions across a wide range of renewable markets. Ultracapacitor systems use sustainable based products offering a long-lasting source of reliable high-power energy storage that can help eliminate lead-acid and other hazardous materials in batteries.

Argentina's energy secretariat said on Tuesday that a new government resolution has increased the maximum capacity limit for renewable energy self-consumption to 12 MW from 2 MW. Rooftop solar array. Featured Image: Ralf Gosch/Shutterstock .
