

Aurora"Grid is working on the integration of EVs batteries providing ancillary services to the grid (V2G) or to building (V2B). Moreover, we started to focus on the development of an EMS for Second-life batteries applications.

Lausanne utility, Services Industriels de Lausanne, has financed via "Fond Efficacité Energetique" the development of Aurora's Grid 1.0. This project started on June 2016 and it is finishing on April 2018. The main results of this project are: the investment cost of a battery storage system can be reduced up to 20% while its ageing reduced ...
