

# Australia island green power

Jose joined Island Green Power in 2021 as Chairman for Island Green Power Spain SL. ? Jose was Minister of Industry, Energy and Tourism of the Spanish Government (December 2011-April 2016). Prior to this he was the Deputy Prime Minister of the Regional Government of the Canary Islands (June 2007-October 2010).

Our mission is to help countries increase their solar energy usage, making more renewable energy possible whilst drastically reducing carbon emissions. To achieve this, we are working on projects around the world, including the UK, Spain, Italy, Australia and New Zealand.

Established in 2013, we specialise in the development of utility-scale solar projects and battery storage systems with operations across the UK, Spain, Italy, Australia and New Zealand. ? Our mission is to help countries increase their solar energy usage, making more renewable energy ...

Australia. Island Green Power's mission is to help countries across the world to increase their solar energy usage, making more renewable energy possible, saving thousands of tonnes of CO<sub>2</sub>, and helping the UK on the journey to net zero by 2050. IGP's development pipeline is currently targeted to provide

Macquarie Green Investment Group Renewable Energy Fund 2 (MGREF2) has acquired a 50% stake in UK renewable developer Island Green Power. Concurrent to this, Macquarie Asset Management - which manages the MGREF2 on behalf of its institutional investors - has also acquired a stake in a 65MW ready-to-build solar project in Suffolk, UK.

UK infrastructure and private equity investment manager Foresight Group LLC has set up a joint venture (JV) with solar project developer Island Green Power to work together on a UK pipeline of close to 700 MW

The project is expected to supply enough clean energy to power 66,894 households, to offset 148,504t of carbon dioxide emissions (CO<sub>2</sub>) a year. The project cost is expected to be around \$165.68m. The solar power project consists of 300,000 modules.

Australia. Island Green Power's mission is to help countries across the world to increase their solar energy usage, making more renewable energy possible, saving thousands of tonnes of ...

The project was developed by BayWa, Island Green Power UK and Overland Sun Farming. The project is currently owned by Lighthouse Infrastructure Management with a stake of 100%. Hughenden Solar PV Park is a ground-mounted solar project which is spread over an area of 83 acres. The project supplies enough clean energy to power 6,800 households.

The project was developed by BayWa r e Renewable Energy, Island Green Power UK and Overland Sun

Farming. The project is currently owned by BayWa r e Renewable Energy. Yatpool Solar PV Park is a ground-mounted solar project which is ...

Jones Day advised Macquarie Asset Management (&quot;MAM&quot;), via Macquarie Green Investment Group Renewable Energy Fund 2 (&quot;MGREF2&quot;), in its acquisition of 50% of the shares in Island Green Power Limited (&quot;IGP&quot;), a UK-based renewable energy developer focused primarily on the development of utility-scale solar plants. IGP has an established pipeline in the UK, Spain, ...

Our expertise is industry leading. We operate around the world sourcing, assessing and developing potential sites. We are proud of our proven ability which delivers industry leading solar farms and battery storage projects. ? So far 21 of the projects we developed are successfully operating, with more under construction.

The project is being developed by Island Green Power UK and Overland Sun Farming. These companies also have ownership stakes in the project. Hay Sun Solar PV Park is a ground-mounted solar project which is planned over 660 hectares.

Two coal power stations in the east midlands - Cottam and West Burton A - are now to be home to solar PV with a combined capacity of over 1GW. Developed by Island Green Power, the Cottam Solar Project is to generate up to 600MW, while West Burton Solar Project is to generate up to 480MW. The sites will also feature energy storage facilities.

Established in 2013, we specialise in the development of utility-scale solar projects and battery storage systems with operations across the UK, Spain, Italy, Australia and New Zealand. ? Our mission is to help countries increase their solar energy usage, making more renewable energy possible whilst drastically reducing carbon emissions.

Over nearly a decade, Island Green Power has successfully developed more than 1 GW of renewable energy assets and secured a diverse development pipeline with a combined capacity of 11 GW. Macquarie Asset ...
