

Australia solar panels schemes

Are solar systems a good option for Australian households?

Solar (PV) systems provide limitless free energy from the sun's radiation and are undoubtedly the best small-scale renewable energy source for Aussie households. Unfortunately, solar systems are expensive to buy and install, which is where the Australian Government's rebates come into play.

How can Australian government support the adoption of solar energy?

At the national level, the Australian Government has implemented and developed several initiatives to support the adoption of solar energy. One key program that provides financial assistance through small-scale technology certificates (STCs) is the Small-scale Renewable Energy Scheme (SRES).

Are solar panels a good investment in Australia?

Updated on 31 October 2024 Australia boasts abundant sunshine, making solar power an attractive and environmentally friendly option for homes and businesses. To encourage the switch to renewable energy, the government offers a range of financial incentives and tax breaks to help offset the upfront cost of installing solar panels.

What is a solar rebate in Australia?

In Australia, solar rebates function as a discount scheme for households that install a renewable energy system, or a sustainably-powered hot water system. While technically more of a financial incentive than a rebate, this system operates similar to a voucher system.

Is South Australia a solar energy powerhouse?

South Australia is a solar energy powerhouse, with the uptake of small-scale solar energy systems supported by the following programs. National solar subsidy - while this subsidy reduces each year, it's still very generous. For example, a 6.6kW system attracts a subsidy of approximately \$2,300 in 2024.

How much does a solar system cost in Sydney?

National solar subsidy - available across New South Wales for all system sizes, the national STC scheme can reduce the upfront cost of a 6.6kW system installed in Sydney by around \$2,300! Note that system prices advertised in New South Wales would already factor in this amount.
