

Austria lithium batteries europe

Who is European lithium?

European Lithium is a listed (ASX: EUR) (FRA: PF8) (OTC: EULIF) mining exploration and development company focusing on its wholly owned Wolfsberg Lithium Project in Austria. We aim to be the first local lithium supplier into an integrated European battery supply chain.

Where is European lithium located?

European Lithium is focused on the development of its wholly owned Wolfsberg Lithium Project which is located in Carinthia, 270km south of Vienna, Austria. The Project is located 20 km east of Wolfsberg, an industrial town, with established infrastructure, including access to the European motorway and railway network.

What is European lithium's Wolfsberg Lithium Project?

Having lagged behind, Europe is now investing billions of Euros to transform its auto industry and become a leader in electrified mobility. European Lithium's Wolfsberg Lithium Project is in the heart of Europe's burgeoning cluster of battery manufacturers. Confirmation *You agree to add your personal information to our mailing list.

Will European lithium be Europe's first local supplier of critical lithium hydroxide monohydrate?

European Lithium is aiming to be Europe's first and largest local supplier of critical lithium hydroxide monohydrate (LHM) in the region. Tony Sage, Chairman, commented on the DFS results: "The robust DFS provided by DRA provides confidence in the commercialisation of the Wolfsberg Project.

When will European lithium start producing lithium hydroxide?

The Company is aiming to commence lithium hydroxide production at the project in Q1 2025 (subject to funding, approvals by the Austrian government and COVID-19 restrictions). "European Lithium aims to fast track the development of the Project which has the potential to become a major producer of lithium in Europe."

How will European lithium finance the project?

European Lithium will structure the project financing to ensure that there is a mix of offtake finance, private equity, bank credit, export credit finance for equipment sourced in Europe, and shareholder funding.

Lithium Market Lithium in Europe Lithium Batteries Lithium in Europe On a global basis, China is the largest consumer of lithium with approximately 40% consumption in 2015. Europe is the second largest with 21%, followed by ...

Lithium batteries are found in everything from phones and laptops to watches, cameras and toys. For shipping, all types of lithium batteries are classified as dangerous goods -- with special regulations for packing,

labelling, documentation and handling.

European Lithium's mining activities are dependent upon the continuation of the Mining Licences, which require annual performance of mining works. In January 2014 and extended in December 2015, a suspension from this requirement was obtained from the Austrian Mining Authority for the years 2014 to 2017 in order to undertake technical studies.

Its initial flagship asset is the Wolfsberg Lithium Project located in Carinthia, 270 km south of Vienna, Austria. The Wolfsberg Lithium Project is the first fully permitted mine in Europe and is strategically located with access to established road and rail infrastructure and is expected to be the next major producer of key lithium products to ...

Work is set to begin at Samsung SDI Battery Systems (SDIBS) lithium-ion battery plant following the Korean firm's official opening ceremony. The company will begin operations to manufacturer EV batteries for the European, American and Chinese markets at the plant in Graz, Austria.
