

Does Austria have a market for energy storage technologies?

A study 1 carried out by the University of Applied Sciences Technikum Wien, AEE INTEC, BEST and ENFOS presents the market development of energy storage technologies in Austria for the first time.

How much solar power does Austria have?

As of the end of 2022,solar power in Austria amounted to nearly 3.8 gigawatt(GW) of cumulative photovoltaic (PV) capacity,with the energy source producing 4.2% of the nation's electricity.

How big is Austria's hydraulic storage power plant capacity?

In 2020,Austria had a hystorically grown inventory of hydraulic storage power plants with a gross maximum capacity of 8.8 GWand gross electricity generation of 14.7 TWh. This storage capacity has already played a central role in the past in optimising power plant deployment and grid regulation.

Good growth of storage systems in the coming years. Solar Power Europe's forecasts for Austria in conclusion point to good growth until 2023, the year in which the incentive for BESS systems should end at the moment, but which will in any case lead to Austria having a cumulative capacity of 521 MWh to 2025, therefore more than triple, overall ...
