What is an automated storage and Retrieval System (AS/RS)?

The technology we now know as an automated storage and retrieval system (AS/RS) was originally developed by Dematic's predecessor Demag, and its foundation of innovation lives on in today's modern high-bay warehouses and efficiently controlled material flows in industry and logistics.

Is it time for an automated storage and retrieval system?

It may be time for an automated storage and retrieval system (ASRS). At their core, automated storage and retrieval systems, or ASRS for short, are computer-controlled inventory management systems that automate the storage and retrieval of unit loads for picking, packing, and shipping.

What are automated storage and retrieval systems (ASRS)?

At their core, automated storage and retrieval systems, or ASRS for short, are computer-controlled inventory management systems that automate the storage and retrieval of unit loads for picking, packing, and shipping. Solutions can range from miniload or shuttle systems to pallet shuttle to vertical lift modules.

What is a storage module in AS/RS?

Pallets, baskets, bins, containers, drawers are commonly used in AS/RS as storage modules. The station where the loads are taken in or out of the AS/RS termed as I/O stations. They are mostly accessed by external handling system that brings the loads into the AS/RS or takes out of AS/RS.

When was the first storage and retrieval machine invented?

The first storage and retrieval machine went into operation in 1962, installed at a Bertelsmann book-club warehouse in Gutersloh, Germany. Though it was manually controlled from a cabin on the mast, it did offer some semblance of automation...via punch-card control.

How does ASRS work in a warehouse?

ASRS operate in conjunction with a warehouse management system (WMS) to optimize product storage, increase labor throughput, and warehouse picking strategies. A WMS supports daily warehouse planning and identifies where to allocate resources to meet customer demand. How prevalent are ASRS solutions in warehouses?
