

What is a modular vertical storage solution?

Created to make the most of available vertical space and save floor space at the same time, Modula automated vertical storage solutions are suited to any type of product, in any industry sector or environment, and can be customised to various payloads, heights, sizes and options.

What is vertical storage?

Vertical storage, as the name implies, is based on solutions that are tall in design. These solutions fully utilize the vertical space available in a building so that only a minimum of floor space is needed for storage purposes.

Why should you choose Modula automatic vertical storage solutions?

Modula automatic vertical storage solutions are designed to save space and time and improve process efficiency. The automatic vertical tray warehouses were designed according to the "goods-to-man" principle: there is no need for operators to move around the warehouse to pick or refill your goods.

What is a Modula automatic vertical tray warehouse?

Modula automatic vertical tray warehouses allow you to store goods in a clean, tidy, safe and fast-moving system, reducing the number of movements operators need to make and avoiding damage to your goods. Modula automatic vertical storage solutions are designed to save space and time and improve process efficiency.

What is an automatic vertical tray warehouse?

The automatic vertical tray warehouses were designed according to the "goods-to-man" principle: there is no need for operators to move around the warehouse to pick or refill your goods. Instead, the products are brought directly to the picking bay.

Why should you choose a Modula automatic vertical warehouse?

Modula automatic vertical warehouses have the great advantage of optional configuration of the height, size of the tray and bay, load capacity and number of trays and workstations, down to the details of single trays that can be customised with partitions and dividers.

The TORNADO Automated Vertical Storage Machine is a dynamic storage and retrieval system that boosts handling efficiency by up to 65%, and increases floor space capacity by up to 70%. An ultra-fast, virtually noiseless, computer-controlled storage and transfer lift system, the TORNADO is designed to maximise storage on the smallest possible ...

Custom-made storage systems **LARGE QUANTITIES**. Matter is your unique partner for the design and manufacturing of intra-logistics handling and storage systems for the steel industry. It offers a wide range of flexible and customized solutions. Matter automatic warehouses can handle and store different materials such

as bars, profiles, tubes, billets, sheets, dies and components.

The vertical lifts transport the items to a conveyor system, which leads to picking stations. Pros & Cons: Traditional automation provides high throughput and storage density. However, the interdependency of storage and throughput equipment means expanding one requires expanding the other, potentially leading to overinvestment in either aspect.

Created to make the most of available vertical space and save floor space at the same time, Modula automated vertical storage solutions are suited to any type of product, in any industry sector or environment, and can be customised to ...

A vertical lift module, also known as tray lift and lift storage system, is an automated storage system for small parts. A vertical lift module resembles an oversized drawer cabinet made from metal with two large warehouse areas (carrier areas). The carrier areas can be compared to a ...

A vertical lift module offers more storage capacity compared to an order picker.. And while an order picking forklift can reach impressive heights of up to 32 feet above the floor, a vertical lift module can store goods more than 46 feet.. Vertical lift modules are ideal for picking individual parts as needed. They can hold a great number of items -- both by quantity and ...

What is an automatic (paper) roll storage system? A paper roll high-bay storage system is designed to fully automate the storage of rolls of different sizes and weights. Automatic storage and retrieval permits optimal use of available vertical space. Roll storage systems can also be used for coils, windings, foils or other items in roll format.

Space-saving. Compact Vertical Storage Lifts store your items vertically, securely and in a controlled environment. We have a range of machine models (widths and depths) and we are able to specify machine heights in 150mm increments allowing us to maximise the storage available on any given footprint.

Moval Automatic Vertical Retractable Wall is a custom manufactured, fully automatic, flat, rigid retractable wall system that provides vertically folding space division with excellent acoustic ...

Automated storage and retrieval systems or computer-controlled systems that can efficiently store and retrieve goods. At Modula, we provide automated storage solutions and retrieval systems to help further optimize ...

Automated storage and retrieval systems, also known as ASRS, are extensively utilized in both manufacturing and distribution centers. They can replace extensive shelving to save floor space, improve employee safety and boost productivity.. Whether you're wondering how these solutions work or deciding which type of ASRS to invest in, this 101 guide will cover ...

Revolutionize Your Operations with Automated Vertical Storage. Transform inefficiencies into profitability

through streamlined material handling. Explore our solutions. Optimize Usage of Your Space Reinvent the capabilities of your ...

Modula is an automated vertical storage system with a series of trays which is designed to optimise space, work and warehouse management. It is the ideal solution for issues surrounding the management, picking and retrieval of components, as well as semi-processed and finished products, in a diverse range of Industries and applications. ...

Tech-Mark Automation & Controls - Manufacturer of Vertical Storage System, Mobile Compactor & Automated Storage and Retrieval System from Pune, Maharashtra, India. Tech-Mark ...

A vertical lift module, also known as tray lift and lift storage system, is an automated storage system for small parts. A vertical lift module resembles an oversized drawer cabinet made from metal with two large warehouse areas ...

ELF Automation is an Australian Manufacturer of Vertical Lift Machines and Automated Storage & Retrieval Systems that assist companies to increase profitability through improved output and accuracy. ... -edge design, superior ...
