

What is the difference between automated warehouse solutions & Vertical Lift Modules?

Automated warehouse solutions, like automated storage and retrieval systems and automated warehouse pickers, can eliminate manual tasks, such as transporting heavy inventory and manual picking. On the other hand, vertical lift modules can maximize your available warehouse space by taking advantage of your ceiling height. 3.

What is a modular vertical storage solution?

Created to make the most of available vertical space and save floor space at the same time, Modula automated vertical storage solutions are suited to any type of product, in any industry sector or environment, and can be customised to various payloads, heights, sizes and options.

Why should you choose Modula automatic vertical storage solutions?

Modula automatic vertical storage solutions are designed to save space and time and improve process efficiency. The automatic vertical tray warehouses were designed according to the "goods-to-man" principle: there is no need for operators to move around the warehouse to pick or refill your goods.

What are vertical storage solutions?

Vertical storage solutions are perfect for making the most of the height available in buildings, saving floor surface. These products are the ideal answer for a clean, tidy, safe and fast-moving warehouse.

Where can you find a modular lift automated vertical Carousel system?

You can find Modula Lift automated vertical carousel systems in shops, ironmongers', warehouses and manufacturing, as a production buffer or as storage space. The best automated warehouse system to recover space and increase security.

What is the best automated warehouse system?

The best automated warehouse system to recover space and increase security. The Modula Lift vertical warehouse is the ideal solution for storing industrial and semi-finished products, spare parts and any kind of product in any industrial environment and every department.

The best automated warehouse system to recover space and increase security. The Modula Lift vertical warehouse is the ideal solution for storing industrial and semi-finished products, spare parts and any kind of product in any industrial ...

Maximize production space with durable vertical storage solutions for manufacturing facilities. Get Started. Industries. These automated storage and retrieval systems increase employee safety ...

Automated vertical storage Modula Lift ... The company designs and manufactures vertical lift modules, picking solutions and WMS software for companies of all sizes, from every industry. ...

The benefits of Modula vertical automated warehouses: Space Efficiency: Save up to 90% of the occupied floor space compared to traditional storage solutions. Time Savings: Expedite picking operations, enhancing overall efficiency. ...

A vertical carousel (VC) is an automated storage and retrieval system that is designed to store inventory while reducing the floor area needed for storage, thanks to its upright and compact structure.. A typical vertical carousel comprises a series of carriers that are securely mounted on a closed-loop vertical track, all enclosed within a metal casing.
