

What is the government of the Gambia for the energy sector?

The long-term aim of the Government of The Gambia for the Energy Sector, as enshrined in the Vision 2020 document, is to maximise the efficient development and utilisation of scarce energy resources to support economic development in an environment-friendly way.

How can the Gambia improve its energy supply?

Reduce the Gambia's dependence on imports of petroleum products for energy supply; 5.4. Minimise environmental impacts of energy supply through the promotion of more environment-friendly energy supply sources such as renewable energy and natural gas; 5.5.

Is re a solution to energy problems in the Gambia?

Policy makers across Africa have been among the last to embrace Re as a solution to their energy problems. They are often locked into crisis management on a day-to-day basis. The country's policy makers need to be persuaded that Re has a real future in the energy mix of The Gambia. They need to demonstrate this by their actions.

What will the Gambia's future energy strategy look like?

This should form part of The Gambia's future energy strategy. High transmission and distribution losses (over 30% in The Gambia) worsen the energy security problem. They also deepen suppressed demand. Those with the ability to pay will turn to on-site generators. All these have economic, social and environmental costs.

How much energy does the Gambia use?

In 2010, Total Energy Supply (TeS) in The Gambia was 407 926 TOe. The energy consumption per capita in The Gambia in 2007 was 81 kilogrammes of oil equivalent (KGOe) according to figures from the Global Environment Facility (GeF) and the United Nations Industrial Development Organisation (UNIDO) in 2011. Biomass, Kuntaur Wharf on the River Gambia.

Does the Gambia have a wind-related energy project?

There is limited experience in wind-related energy projects in The Gambia. Much of the early work was restricted to village water pumping projects. In the 1990s, the Department of Water Resources (DWR) actively promoted the use of wind pumps along coastal villages with support from the EU.

By embracing clean energy, The Gambia can improve its citizens' quality of life, create new economic opportunities, and combat climate change. Empowering minds, the third transition holds the key to unlocking human potential and breaking the cycle of poverty. Yet, with a 57% funding gap in education, The Gambia faces tough choices in how it ...
