When charging lithium-ion batteries heat can be generated, if this heat output is too high, a fire may occur, for example, if the lithium-ion battery, charger or cable is defective. Another major risk factor is thermal runaway of lithium-ion batteries. To combat this major issue we introduced a lithium-ion battery cabinet.

A lithium-ion cabinet, also known as a battery charging cabinet or battery safety cabinet, is a special fireproof storage unit designed to charge and safely store multiple batteries simultaneously. Lithium-ion cabinets are often used in industrial and commercial environments where a large number of batteries are used, for example in factories ...
