Does EG4 support solar assistant?

Solar Assistant is a third-party application that is not supported by EG4. The cooling fans on the 6000XP are temperature controlled and do not ramp up until they are needed. Consequently, the fan speed is a factor of load and ambient temperature. Under light loads, the inverter will typically be nearly silent.

I also wondered about the price and the fact that I never saw the Signature Solar EG4 LL recommended in any review sites (not a big deal as I have learned most reviews are heavily influenced, if not outright paid for, by vendors). I purchased the EG4 LL 30.7 kw to back up my 6720 kw panel system and connected everything to a Sol-Ark 15k inverter.
