

Is wind energy a source of power in Belgium?

Vermeylen said, however, that wind energy has become an increasingly central source of power supply in Belgium, with the six wind farms in operation delivering between 5 to 6% of the country's total energy production.

Does Belgium have a wind farm?

Wind turbine in the Thorntonbank Wind Farm. Wind power in Belgium has seen significant advancements, starting with the generation of electricity from offshore wind farms in 2009. By 2020, the capacity of these offshore farms reached 2,262 megawatts (MW), matching the combined output of Belgium's largest nuclear reactors, Doel 4 and Tihange 3.

Why is the offshore wind sector important in Belgium?

With a 2,262 MW production capacity, the Belgian offshore wind sector makes a significant and guaranteed contribution towards security of supply. The experience gained during the realization of the first offshore wind parks in Belgium has made it possible for many companies to develop innovative techniques and export them abroad.

Who are winder power?

The site services division for the Winder Power Group. Our specialist in-house team has over 100 years' combined experience in providing full range of services to companies of all sizes, from major utilities to specialist contractors.

How can Engie Electrabel contribute to Belgium's energy transition?

With Ocean Winds, ENGIE Electrabel wants to continue to play a pioneering role in Belgium's energy transition, in which offshore wind energy has a very important place. Our ambition is to have 1,000 megawatts of offshore wind power by 2030, including in consortia such as this one.

Is Belgium developing offshore wind energy in 2021?

The International Energy Agency (IEA) noted Belgium's significant offshore wind energy development, ranking it sixth globally in 2021.
