Les Soleils du Bénin, a special purpose vehicle (SPV) jointly developed by GDS International and Africa Renewable Energy System & Solution ("ARESS"), in partnership with NECT Offgrid Africa, aims to construct and operate a portfolio of 12 mini-grids in Benin.

Since 2016, the Government has undertaken actions to reduce the energy deficit through operating subsidies (fuel purchases and plant rentals) and public investments to increase energy supply (construction of a 120 MW oil-gas plant and ...

This study aims to forecast the energy demand for Benin while reducing greenhouse gas (GHG) emissions and propose alternative solutions to clean energy deployment barriers. The Low Emissions Analysis Platform (LEAP) is used to explore the future energy demand for Benin and associated GHG emissions.

ENGIE Energy Access is the leading Pay-As-You-Go (PAYGO) and mini-grids solutions provider in Africa. The company develops innovative, off-grid solar solutions for homes, public services and businesses, enabling customers and distribution partners access to clean, affordable energy.

From road networks to vital structures, our service illuminates the intricate web of transportation and infrastructure systems in Benin. Explore interactive visualizations, unlock patterns, and gain valuable insights to foster sustainable development, enhance connectivity, and drive economic growth across the nation.
