What is the best generator for backup power?

The ultimate generator for backup power is a whole-home generator. They're expensive, but if you can afford one, they're highly convenient. My favorite is the Generac Guardian series. The line has a wide range of power levels, they all come with wi-fi connectivity, and they're well-designed for permanent outdoor installation.

Are portable generators a good backup power option?

Portable generators are popular emergency backup power options thanks to their lower cost, the portability to use them for other activities, and the ability to store them out of the way. The downside is that most portable models can't power your whole house, so you have to pick and choose what to keep running and what to do without.

Can a solar generator be used as a backup power source?

Solar generators work well as a home backup power source. Your solar panels keep the generator powered, so there's no need to purchase fuel. You can store them inside, and they're often relatively compact. And they're better for the environment than a gas generator.

Why do you need a backup generator?

When the power goes out, having a backup generator ready to go solves a lot of problems. It keeps your fridge cold, so food doesn't spoil. It ensures that essential medical equipment continues to function, preventing an emergency. And, of course, it keeps the light on.
