Are batteries necessary for an off-grid solar installation?

Batteries are the heart of any off-grid energy system. And with solar and battery storage exploding in the last 5 to 10 years, equipment manufacturers are constantly putting out products that are more efficient and ever lower in price. If you're looking to install an off-grid solar installation, batteries are an integral component of that.

Will Belize Electricity compensate you for excess solar energy?

The hope is that through regulations, Belize Electricity Ltd will have to compensate you for excess solar energy flowing to the grid during the day and off-set it against the electricity you are drawing from the grid at night; however, the reality today is the opposite.

What are the different types of batteries for off-grid energy storage?

If you're looking at batteries for off-grid energy storage, you've got three different technologies available, each with their own unique drawbacks and benefits: lead-acid, lithium-ion, and nickel-iron.

Should I use a grid-tie or off-grid Solar System?

A grid-tie solar system with battery back-up is the best solution if you are currently connected to the grid and want a solar back-up for grid outages. An off-grid solar system is the best solution if you do not have access to the grid and don't want to depend on a generator only. Can I still utilize my solar energy during the night?

What is off-grid solar?

It provides solar energy for your daytime needs and allows surplus energy to flow to the integrated batteries, providing peace of mind at night or during power outages. Off-grid Solar empowers you with self-sufficiency and independence. Discover the perfect solution for your remote cabin, communication site or island retreat.

Is a grid-tie Solar System a viable option?

If your monthly electricity bill exceeds BZD 500 and your energy consumption is mostly during the day, then adding a grid-tie solar system with or without battery back-up is more economically viable than going completely solar off-grid. Will my grid-tie solar system stay on during a grid outage?
