1. Calculate Your Power Load. If you haven't already, you'll need to calculate the total power you need from your solar panel system. The power load necessary for a home backup system will look much different from ...

Solar panel setups should also have a disconnect switch that will turn off the solar panel system. Many solar panel systems have two disconnect switches: a DC disconnect (disconnecting the DC current between the solar panels and the inverter) and an AC disconnect (disconnecting your inverter from the grid with grid-tied systems).

Q Cells, which is a brand manufactured by Hanwha, is the best solar company for value, in our opinion. Despite being more affordable than most other tier-one solar panel brands at around \$3.00 per watt, its panels still have above-average efficiency ratings and performance specs. They're not quite as impressive in their durability as some other options, ...

Grid-Tied Kits. The Grid-tied solar power kit is the simplest of all solar solutions. It contains solar panels and an inverter, and no batteries.. If you have high usage in the day, such as pool pumps, boreholes, washing machines, geysers etc., this solution will compensate for the energy use and offer the highest return on investment. They are often paid back within three ...
