The United States clarifies the AD/CVD investigation on solar energy imports from Southeast Asia The US Department of Commerce clarified its position on anti circumvention of solar energy investigation, saying that it would allow the import of solar panels made in a third country using batteries made in Southeast Asia.

It is expected that some solar energy markets in Europe, especially in German-speaking countries and the United Kingdom, will grow by more than 100% this year, compared with about 15% in the United States this year. In addition, Japan and other Asian markets will also accelerate the expansion of the construction and use of solar energy.

He points out that Trina has been testing dual panels with partners from the United States and China. Although the dual panels represent the key technology of albedo capture energy generation, tracker technology and smarter inverters are the supporting vehicles needed to maximize double-sided gain. ... info@bluesunpv . bluesun.pv ...

Researchers from the United States Energy Information Administration (EIA) predict that by 2023, the installed photovoltaic systems in Texas (7.7GW) and California (4.2GW) will account for 41% of the installed capacity of new photovoltaic systems in the United States.

On September 12 th-14 th, 2023, Bluesun Solar team will attend the SOLAR POWER INTERNATIONAL 2023 in America. SPI (Solar Power International) is the largest solar photovoltaic exhibition in North America. Jointly hosted by the Smart Power Alliance (SEPA) and the Solar Energy Industry Association (SEIA) of the United States.
