The solar PV will supply St. Kitts with 30 - 35% of the annual electricity demand utilising sustainable, solar energy with zero emissions. The solar and storage system will replace over 4,000,000 gallons of diesel per year.

Ground has been broken on the St Kitts microgrid while negotiations and developments continue with the Nevis Geothermal project. The St Kitts facility to be comprised of 37.5MW solar PV and a 14.8MW/45.7MWh lithium-ion battery energy storage system is a major development for the nation and a landmark for the region.
