1964 Expedition. Because of its location, weather researchers have long thought it a great place to put a weather tower. On 2 April 1964, the Royal Navy's Antarctic ice vessel HMS Protector was sent to the island to investigate a new area of the land created by lava flow ten years prior to the expedition. Lieutenant Commander Allan Crawford and his team ...

The closest lands to Bouvet are more than 1000 miles away. Queen Maud Land of Antarctica is just over 1,000 miles and Cape Town is about 1600 miles away. Therefore living off of this island and depending on shipments could be quite the challenge. Bouvet Island is a frozen inactive volcano. The majority of the island is covered by a glacier!

La isla Bouvet es una isla subantártica, volcánica, casi completamente cubierta por glaciares y deshabitada. Geográficamente La isla Bouvet es el punto de tierra firme más aislado del planeta, ya que no hay tierra firme ni islas en 1750 km a la redonda. Está situada a esa distancia al norte de la Tierra de la Reina Maud (en la Antártida Oriental), a 1850 km al este de las Islas Sandwich del ...
