In 1971, Norway declared the island a protected nature reserve. Today, there is virtually no sign of human activity at Bouvet, with the exception of a single weather station located at Nyrøysa. This is the most common landing point on the island created by a rockslide in the 1950s. Wildlife of Bouvet Island

From January to December 2019, under the complex background of rising risks at home and abroad, China"s textile machinery industry is under pressure and the main economic indicators of the industry are showing a downward trend.

La isla Bouvet (en noruego: Bouvetøya) es una isla subantártica, volcánica, casi completamente cubierta por glaciares y deshabitada. [2] Se encuentra localizada en el océano Atlántico Sur, unos 1750 km al norte de la Antártida, 1900 km al este de las islas Sandwich del Sur y 2520 km al suroeste del cabo de Buena Esperanza (en Sudáfrica), por lo que se la considera la isla ...

Deep in the South Atlantic Ocean, thousands of kilometers away from any settlement, lies the most remote island in the world: Bouvet Island. This small and icy uninhabited island is a nature reserve and a dependency of Norway, despite being located 12,500 km away from the Norwegian mainland. Few people have set foot on this...

1964 Expedition. Because of its location, weather researchers have long thought it a great place to put a weather tower. On 2 April 1964, the Royal Navy"s Antarctic ice vessel HMS Protector was sent to the island to investigate a new area of the land created by lava flow ten years prior to the expedition.Lieutenant Commander Allan Crawford and his team ...
