Where can I find a user manual for my Moixa smart battery?

Contact us if you are on a special tariff so we can ensure your Smart Battery is giving you the best savings. This is the user manual for the Moixa Smart Battery Control Unit (MCU) V3C, both 2kWh and 3kWh. Please go to for user manuals for other products. There are no user serviceable parts in your Moixa Smart Battery.

What is a Moixa smart battery?

The Moixa Smart Battery is installed near your consumer unit (fuse box) and measures the energy coming from your solar panels, and being used in your home. Its built in technology knows when to store your energy and when to provide it. Solar PV AC Inverter Fuse Box Moixa Smart Battery LED lighting and electronics Appliances Moixa Dashboard

How long does a Moixa smart battery last?

Standard Warranty: 5 years unit, 10 years batteries at 70% of initially rated capacity. Extended GridShare Warranty: For as long as the customer is a participant of the GridShare scheme the Moixa Smart Battery remains under warranty.

Why is my Moixa smart battery flashing?

Flashing indicates the Moixa Smart Battery is operating normally. If the red FAULT light is on it indicates that the Moixa Smart Battery has detected a fault. Please call Customer Support before performing any action. If the Moixa Smart Battery is in fault (not providing power) then it can be temporarily placed in bypass mode.

Moixa Smart Battery customers will also gain access to your personalised Moixa Dashboard, which allows you to track details a range of details with regards to your energy generation and home energy usage. Our innovative Moixa ...

Moixa is a British technology company, we make technology smarter so that we can help you save money on your energy bills. Our Smart Battery helps households save money by storing spare-solar power or cheap tariff electricity. GridShare is Moixa's software platform that delivers parts of the smart grid to maximise the benefits of your smart ...

Founded in 2010, the company offers a patented Smart Solar Battery system, which combines solar power and in-house battery storage technology. This works alongside artificial intelligence enabled GridShare Software platform - both technologies the company believes can disrupt the energy sector.

A £10.8 million project on the Isles of Scilly will provide a model for electric vehicles and home batteries to play a major role in low-carbon smart energy systems around the world. Moixa will develop platforms allowing electric vehicles and smart home batteries to be used to help balance supply and demand within the islands"

4kWp solar system + 4.8kWh Moixa Smart Battery = £8,270 (inc. VAT & standard installation) The life expectancy of a PV panel is 25-30 years, though there will be some degradation over time resulting in a decrease in energy output. Moixa offers tier-one rated panels which come with a 25-year "power output warranty". This typically ...

2.3 Moixa Smart Battery Technical Specification 2 & 3kWh Models Moixa integrated Smart Battery and power delivery system. 50.5cm 34.5cm 24.5cm Dimensions H: 50.5 cm x W: 34.5 cm x D: 24.5 cm Weight 39.7 kg (2kWh Smart Battery) 48.7 kg (3kWh Smart Battery) Power Mains connection AC 240V.

From the point of view of Total Connections, the interesting aspect of the programme is in the Home Battery Management System being developed by British company Moixa. Smart home battery technology will allow homes with solar photovoltaic panels, a key element in the infrastructure, to save money by using more of the power they generate.

Optimising the battery behaviour with Moixa's GridShare software. The GridShare software underpinning Moixa's smart energy system can identify a home's energy generation, consumption patterns, weather forecasts, and available flexible ...

GridShare is the software that puts the "smart" in a Moixa Smart Battery or to the Moixa Hub in a Moixa Optimised Battery System.. For homes on a time-of-use tariff, GridShare can identify a home's energy generation and consumption patterns, look at weather forecasts and review the home's energy tariff.

The announcement comes hot on the heels of Moixa's new family-sized 4.8kWh smart battery which will help owners take advantage of the growing number of time-of-use tariffs, which reward customers for powering their home and ...

The Moixa Smart Battery allows you to store electricity charged from your solar panels, rather than sending spare solar energy back to the grid. Can be added to existing solar panels; Store unused solar electricity to power your home in the evening; Charge your Smart Battery from the grid with an off-peak tariff like Economy 7

6.3 Smart Battery End User Agreement This End User Agreement (the "Agreement") relates to the operation and use of Moixa's Smart Battery (the "Product") and is made between Moixa Technology Ltd ("we" or "us") and you, the customer in whose property the Product is installed.

The announcement comes hot on the heels of Moixa's new family-sized 4.8kWh smart battery which will help owners take advantage of the growing number of time-of-use tariffs, which reward customers for powering their home and charging their vehicle when electricity demand is low.
