By reusing materials from old batteries, the demand for virgin resources is reduced, thereby lowering the need for resource-intensive and often ecologically damaging mining operations. ... LOHUM Cleantech Private Limited, Plot No. D ...

Joint Venture (American Metals / Lohum Cleantech / ReElement Technologies) 26-Sep-2024: Joint Venture: Electrical Equipment: To view Lohum's complete investments history, request access » Ready to get started? Request a free trial. Lohum FAQs. When was Lohum founded? Lohum was founded in 2017.

New Delhi- Homegrown battery-tech startup company Lohum Cleantech on Thursday announced to set up a lithium-ion battery materials processing facility in the US with ReElement Technologies and American Metals for \$30 million. The joint 15.5 gigawatt hours (GWh) facility will be set up with an initial investment of \$30 million, creating 250 "green jobs". ...

Rajat Verma's LOHUM Cleantech in Delhi stands out in two respects. One, in addition to making "first life" or new batteries, the entrepreneur is also building a strong line of business out of "second life" batteries -- separating out the still viable cells from used batteries and repurposing them into batteries for suitable lower ...

Lohum is Mercedes-Benz Energy's first partner in Asia to source lithium-ion battery for recycling and repurposing. One of India's largest producers of lithium-ion battery raw materials through recycling, repurposing, and low-carbon refining, Lohum is an integrated battery recycling and reuse company that has become the first partner for Mercedes-Benz Energy in Asia.

Baring Private Equity Partners-backed Lohum Cleantech Pvt Ltd is betting big on the rapidly-growing EV battery market. The Noida-headquartered company, founded in 2018, is today commanding 70 per cent share in the lithium-ion battery recycling space through its patented technologies. The company plans to end the current fiscal year with a ...

Which activities in the end-of-life management of LIBs, like Battery Recycling, does LOHUM undertake? Currently, LOHUM can annually recycle 2 GWh of end-of-life lithium-ion batteries ...

Picture a classic Caribbean beach: a stretch of perfect sand, sailboats and yachts docked in the bay, lively bars slinging potent cocktails with lush mountains in the distance. White Bay is this place: one of the best beaches in the British Virgin Islands. Oh, and did we mention snorkeling? The bay is protected by a coral reef teeming with marine life, making it one of the best ...

LOHUM is a producer of sustainable Li-ion battery raw materials through recycling, repurposing, and low-carbon refining, and the only integrated battery recycling and reuse company in the world. Below is an excerpt from BW Businessworld's interaction with Rajat Verma, Founder and CEO of LOHUM . How has the brand evolved and grown in the last four years?

The British Virgin Islands enjoy a unique position -- easy to get to, but still a hidden enclave of secluded serenity. A network of boat docks and airports form a cascade of connections that ensure your every travel experience will always ...

This means fewer new batteries need to be manufactured, reducing the demand for virgin resources and the associated environmental impact. Moreover, it reduces the pressure on the supply chain, making lithium-ion batteries more accessible and affordable for a broader range of applications. ... LOHUM Cleantech Private Limited, Plot No. O-17, Site ...

Furthermore, a nickel-rich lithium-ion battery (LIB) made with recycled materials reduces the total greenhouse gas (GHG) footprint by over 28% compared to one manufactured with virgin materials. Thanks to this two-fold promise of domestic critical mineral supplies and reduced environmental footprint, global demand for virgin battery minerals ...
