

What does BTE stand for?

Loading map... The South Caucasus Pipeline (also known as Baku-Tbilisi-Erzurum Pipeline, BTE pipeline, or Shah Deniz Pipeline) is a natural gas pipeline from the Shah Deniz gas field in the Azerbaijan sector of the Caspian Sea to Turkey.

Does Azerbaijan export natural gas to Europe?

Since December 2020, Azerbaijan exports natural gas to Europe via three interconnected pipelines - the South Caucasus (Baku-Tbilisi-Erzurum or BTE, operating since 2006), the Trans-Anatolian (TANAP, Erzurum-Eskişehir, inaugurated in June 2018), and the Trans-Adriatic (TAP, Eskişehir to Melendugno, Italy).

Does Azerbaijan have a gas pipeline?

Similarly, the BTE gas pipeline which started functioning in 2007, links Azerbaijan with Turkey through Georgia. Georgia's role here is to be a transit country for transportation of natural resources from the Caspian Sea to Turkey, and further to Europe. For Azerbaijan, the energy projects allow to diversify its supply routes to Europe.

What are Azerbaijan's natural gas reserves?

Most of Azerbaijan's reserves are associated with the Shah Deniz field, which forms the beginning of the Southern Gas Corridor (SGC). The SGC will bring natural gas from the Caspian to southern Europe via the Baku-Tbilisi-Erzurum (BTE) and to the Trans-Anatolian and Trans Adriatic pipelines.

Will Azerbaijan sell more gas?

Azerbaijan will sell more gas, which means more revenues for that country; and more gas for Europe. Yet, Azerbaijan may not be able to supply all that gas, and it is not evident that the existing pipelines can carry it. According to the official statistics, in 2021 Azerbaijan produced 28.3 bcm gas, almost 7% more than in the previous year.

Where is Azerbaijan's natural gas produced?

Most of Azerbaijan's natural gas is produced offshore in either the Shah Deniz field or the ACG complex. The Shah Deniz natural gas and condensate field was developed in two phases, beginning with the first phase that started production in late 2006.
