

What will Bulgaria's electricity system operator do in 2024?

By the end of 2024, Bulgaria's Electricity System Operator (ESO) will finish all the investments needed to secure the connection of new power plants with a total installed capacity of 4,500 MW, primarily renewables.

Is Bulgaria ready to connect with Greek electricity network?

Bulgaria is ready with its part of the transmission line to connect with Greek electricity network. The line is 122 kilometers long and the Greek side is expected to complete the remaining 29 kilometers by the end of 2023.

Will Bulgaria build a new power line with Greece?

The plan also sets a goal to increase the cross-border transmission capacity by 2,000 MW. Bulgaria has already finished its part of the new power line with Greece, Tsachev said. Greece needs to build the remaining 29 kilometers of the new interconnector with a total length of 122 km. The expected go-live of the power line is by the end of 2023.

Inter Power Ltd. is a company established in Bulgaria in 2013 year, with the main activity designing and installation of lighting installations for industry and home, electrical installations, home automation systems, construction of photovoltaic power plants, low-current installations (fire alarm, video surveillance, low-current installations)

ESL's UL/cUL 1008 Listed TempTap(TM) generator docking stations are designed to provide end users with a safe and simple solution to connect a portable generator to a grid-tied facility. TempTap is a pass-through junction box that can be mounted to a building and is typically hard-wired to an upstream circuit breaker enclosure or system, such

Kozloduy Nuclear Power Plant is the largest power plant of Bulgaria Energy consumption by source in Bulgaria.
